ABOUT US

The VOK Industrial Production Group began its activities in 2018 (1397 Iranian calendar) specializing in the production of luxury kitchen equipment, including cabinet boards and backsplashes. From the outset, thanks to the distinctive quality and uniqueness of VOK products compared to competitors, the brand quickly secured its position in the Iranian market. Today, VOK is the preferred choice among consumers when selecting materials for Iranian kitchens.

Technical Specifications of VOK Cabinet Boards

Core Material and Veneer | VOK cabinet boards use core materials with reduced veneer, sourced both from Thailand (Vanachai and others) and Iran (Arian Sina and others).

Surface Finish | The surfaces are finished with HPL (High-Pressure Laminate) by Artaweil, available in types ACD 12, 10, 8, and 6.

Board Dimensions | Double-edged boards are offered in widths of 60, 65, 75, 90, and 120 cm, with lengths of 366 and 410 cm, and thicknesses of 3.2 mm and 4.10 mm. The core MDF thickness options are 32 mm and 48 mm.

Country of Manufacture | Iran
Warranty | 2 years

Description

VOK cabinet boards are made from premium-grade MDF sourced from Thailand (Vanachai, etc.) or high-quality Iranian MDF (Arian Sina, Pouya, etc.) in thicknesses of 32 mm and 48 mm. The panel surfaces are laminated with 1+ PL (Formica) coatings applied using modern post-forming machinery that bends Formica around the rounded edges of the boards.
VOK countertop boards represent one of the highest quality and most aesthetically appealing types of MDF panels on the market. They are custom-produced with double-sided HPL or single-sided HPL according to customer specifications.
VOK MDF cabinet boards come in a variety of HPL finishes—including matte, glossy, smooth, and embossed—making them a favorite among interior designers.

VOK double-edged boards are designed for use in cabinets and other areas where both edges are exposed. These boards are available in lengths of 410 cm and 360 cm, with widths ranging from 60 cm to 120 cm, and thicknesses of 32 mm and 48 mm. The boards are offered with radius options of 12, 10, 8, and 6 mm. Veneer Source: All VOK cabinet board veneers are supplied by Artadil and ACD companies.

VOK Backsplash Panels (8 and 16 mm sheets)

VOK backsplashes refer to 8 mm and 16 mm MDF sheets installed between kitchen base and wall cabinets. These panels are laminated with the same HPL finishes used on cabinet surfaces, maximizing beauty and durability to enhance kitchen aesthetics.

Advantages of VOK Cabinet Boards

- Seamless edges without gaps or cracks
- Available in matte, glossy, super matte, and embossed finishes
- Wide variety of patterns and colors
- Competitive pricing

CONCRETE EFFECT

Concrete surface, with its raw, matte appearance and slightly rough texture, conveys a sense of strength, simplicity, and industrial character. Often used in modern and minimalist designs, this type of surface showcases a blend of natural beauty and unpretentiousness. With its various shades of gray and either uniform or veined texture, concrete creates a neutral yet powerful space that feels both calming and robust.

IRON EFFECT

The beauty of rusted iron patterns lies in the charming contrast between decay and nature; warm colors of yellow, orange, and brown form irregular designs on the metal surface, conveying a sense of history and authenticity. These patterns, like abstract paintings of nature, are never repetitive, and each rusted piece tells a unique story of the passage of time and transformation.

LETTER EFFECT

The beauty and texture of rocky surfaces, with their rough, uneven structure full of natural angles and crevices, showcase the power and resilience of nature. This rugged and sturdy texture conveys a sense of strength and durability, adding depth and an earthy, timeless charm to its surroundings. Every crack and irregularity in this structure tells a story of the passage of time and endurance.

VELVET EFFECT

Suede texture, with its soft, velvety surface and matte appearance, is one of the most charming and popular types of leather. Made from the underside of animal hides, it offers a warm, inviting feel while maintaining a natural and elegant look. Thanks to its unique texture, suede gently absorbs light, giving a soft and pleasing matte finish to any space.
